1. Develop Legal Framework
2. Create Assessment Tool
3. Map Legal Landscapes

Policy Surveillance Process

GHSA Project

DEFINITIONS

Legal Mapping: A process for assessing and capturing important features of laws and policies, and for identifying how they vary across jurisdictions or institutions, and over time.

Policy Surveillance: The systematic collection, analysis, interpretation and dissemination of laws and policies across jurisdictions or institutions, and over time.

Legal Assessment: The systematic collection, analysis, interpretation and dissemination of laws and policies across jurisdictions or institutions at one point in time.

LawAtlas: The central place for creating, sharing and accessing authoritative legal health policy surveillance and related resources.

DEVELOPING CODING QUESTIONS

Steps for developing coding questions:

1. Review the law and secondary sources
2. Finalize the list of constructs
3. Develop the response set
4. Convert constructs into questions
5. Capture unexpected response through iterative coding

PREVENT: Immunization Questions

Parent:

Does the law authorize the government to regulate routine vaccination? Yes/No

Child:

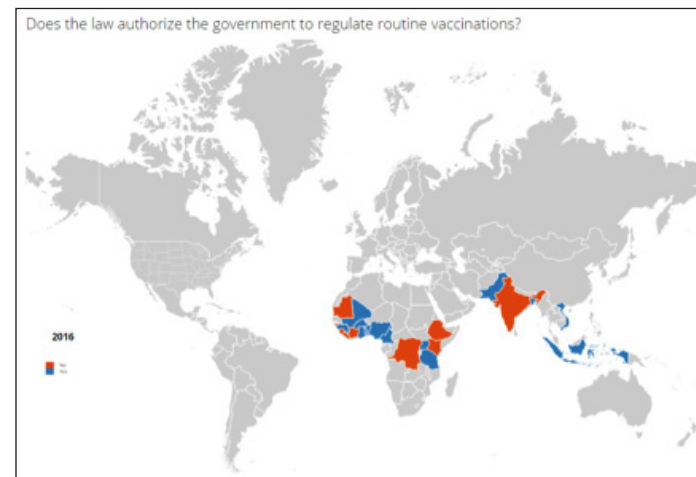

Are vaccine guidelines set by a government agency or non-governmental agency?

Government agency/Non-government agency/None

COLLECTING & CODING THE LAW
